- Wildlife Passage Design
- Beaver Trapping
- Wetland Permitting
- Unit 5 Quiz

Unit 6 - Business Skills

- Business Start-up
- Business Operations
- Marketing
- Funding
- Unit 6 Quiz

Final Exam

Once a student passes the final exam they will graduate from the BeaverCorps Training Course and receive a Certificate of Completion for the completed coursework.

Part 2 Mentored Installations

Each trainee will complete every aspect of a flow device project. Each flow device project will be mentored remotely by Beaver Institute instructors, offering advice as needed. The trainee will be responsible for identifying and making the arrangements necessary to install 4 flow devices in their region, with guidance and advice from Mike Callahan and other Beaver Institute instructors.

Mentoring will be available as needed during and after each project, including:

- Site assessments
- Data Collection and Analysis
- Submitting your Proposal with Cost Estimates
- Flow device construction and installation
- Long-term follow-up and Maintenance
- Troubleshooting

Once the student has successfully installed 4 flow devices, and both they and their mentor feel they are ready to begin working on their own, the student will receive a Certificate of Completion and become a Certified Beaver Wetland Professional.
